# The Implications and Impact of
# "Internet of Things"
## by Beth Brown, Author

*Date: Monday, December 18, 2017*

*Time: 7:00 P.M.*

*Place: Social Hall*

*For more information Sam:* <u>wexler@ariesmart.com</u> *or Jerry:* <u>ljrokoff@bellsouth.net</u>

## Agenda
* Q&A: Questions from the floor on any computer or technology topic
* Club Business: Subjects for future meetings, classes, workshop status…
* Main Presentation

Internet of Things, IoT, refers to the collection and exchange of data between smart devices, sensors and other electronic devices using the Internet and cloud software. What does this mean? And how will IoT affect you? Or more importantly, how has IoT <u>already</u> impacted your daily living? In a complicated world of social media, online retail shopping and autonomous vehicles, learn how to make sense of IoT. Understand the incredible possibilities for IoT to improve your life and the possible consequences you need to be aware of.

Beth Brown, an author and freelance technical writer and editor, will enlighten us about IoT and its implications for the future. She is the author of more than 40 computer science and computer applications books and other publications. An engineering graduate of Florida Atlantic University, Ms. Brown holds a B.S. in Computer Science. She has worked with students and educators worldwide to develop Microsoft Office curriculum materials in addition to her work in programming, research and development, technical writing and business.

At the conclusion, the speaker will be available to answer your questions. New members are welcome to attend and participate.
